REACH ARTICLE CONFORMANCE AND DISCLOSURE STATEMENT

---

**Registration, Evaluation, and Authorization of Chemicals (REACH)**

REACH, the new regulatory system for chemicals management in the European Union (EU), entered into force on June 1, 2007. REACH is a new European Community Regulation on chemicals and their safe use (EC 1907/2006). In accordance with this directive, articles (including aluminum alloy coil) are not required to be registered; however, if an article has a "substance of very high concern" (SVHC) above stipulated concentration, then this SVHC must be disclosed to our customer.

**Information for the Supply Chain**

In accordance with the requirements of REACH, this declaration and disclosure statement is prepared to inform you of the presence of the following "substances of very high concern" (SVHC) as defined by REACH, contained in articles in concentrations above 0.1% weight by weight (w/w):

Article	Substance	CAS No.
Aluminum Alloy Coil (include series: 1xxx, 2xxx, 3xxx, 5xxx, 7xxx, 8xxx, and 9xxx)	No SVHC reported in article in concentrations above 0.1% weight by weight (w/w)	Not Applicable

The SVHC Candidates List can be accessed at the following website:  
[http://echa.europa.eu/chem\\_data/candidate\\_list\\_en.asp](http://echa.europa.eu/chem_data/candidate_list_en.asp)

**Aleris Rolled Products Expectations for its Suppliers**

Aleris expects its Suppliers to understand and comply with REACH. Suppliers must pre-register or register their substances or preparations as required by the Directive.

Suppliers must assess whether the products and parts they supply to our facility contain substances classified as "substances of very high concern" (SVHC) in a concentration of more than 0.1% w/w in the article. If this is the case, this information must be communicated to Aleris Rolled Products. If the total volume of the SVHC exceeds one ton per year this information must be communicated to the European Chemicals Agency.
